

## Context

A blank vertical rectangular box with a thin black border, positioned on the right side of the page.

A park designer has mapped three points on a Cartesian grid to mark the corners of a triangular garden:

- A(-4, 2)
  - B(3, 7)
  - C(6, -1)

Use the distance formula to find each side length, then the total perimeter.

Distance formula:  $d = \sqrt{(x_2 - x_1)^2 + (y_2 - y_1)^2}$

## Questions

1. Find the length of  $AB$ . Show your working.
  2. Find the length of  $BC$ . Show your working.
  3. Find the length of  $CA$ . Show your working.
  4. Find the total perimeter of  $\triangle ABC$ . Give your answer to 1 decimal place and include units.

**Extension:** The map uses a scale of 1 unit = 1.5 m. Convert your perimeter to metres.
