

Context

A park designer has mapped three points on a Cartesian grid to mark the corners of a triangular garden:

- A(0, 0)
 - B(6, 0)
 - C(0, 8)

Use the distance formula to find each side length, then the total perimeter.

Distance formula: $d = \sqrt{(x_2 - x_1)^2 + (y_2 - y_1)^2}$

Questions

1. Find the length of AB . Show your working.
 2. Find the length of BC . Show your working.
 3. Find the length of CA . Show your working.
 4. Find the total perimeter of $\triangle ABC$. Give your answer to 1 decimal place and include units.
